About This Game

Love is in the air. And so is Solitaire!

Enter the enchanting world of Jewel Match as you fall head over heels for this charming new Solitaire adventure!

Discover and rebuild 5 gorgeous scenes as you follow each passionate couple across the land. Play 200 levels, plus 50 bonus mahjong levels to unlock! Dozens of game play variations add to the classic Solitaire, such as obstacles, power-ups, frozen cards, and more!

Search every last level for gems and coins that you can use to purchase new upgrades for each scene, plus aim for the elusive "Perfect" in each level.

Bring your sweetheart and a deck of cards, because all is fair in love and solitaire.

Features

- 200 lovely Solitaire levels.
- 5 beautiful scenes to build.
- 50 replayable bonus mahjong levels!
- Choose between several delightful card designs.

-
- Tons of game play variations and power-ups.

Title: Jewel Match Solitaire L'Amour

This is essentially a fancy tech demo of an incredibly basic game. In fact, I'd go as far as to say this is just Galcon in fancy clothes.

While the graphics are certainly impressive, and it makes me wonder why more games don't use the Unigine engine, the gameplay is flat-out boring.

Anyone that knows me knows that I'm far from a big fan of strategy games. For that matter, if I'm going to play a strategy game, it has to have a little more meat to it than simply choosing whether to send 25%, 50%, or 100% of my troops to a certain waypoint.

You may enjoy it, and it's certainly a valiant effort for an indie game, but it's just not for me.

ps the "tutorial" goes on entirely too long, and makes a point of being intentionally too rough at first, to try and teach you what not to do.

Pass.. Deceivingly Difficult as it progresses... Really well made simple game. If you like puzzle games which make you think this one wont dissappoint. Some levels will take a century if you just play them mindlessly thanks to the level design thus its best if you play it like it should be played... with patience and brains. How can I say this... AoE II was such an amazing part of my growing up in this life. That along with Diablo II truly set my heart on gaming early. This is an absolutely fantastic blessing being able to replay this game and to have easier access to playing with my friends. In college, we passed around a flash drive with AoE II on it and recruited anyone who cared to join us in our weekly matches going until the late hours of the night. This adaptation brings some new factions, some high definition overhauling of graphics, and some easier to access mods. I have had no issues!. This is the most 3rd person game your ever gonna get for less than 2 bucks and the best thing.....its a good game !!. I love this game, absolutely LOVE IT. I've watched thousands of videos of it and I'm absolutely in love. But there's one issue. I have a pretty good computer, and I still can't run the game without it lagging REALLY BAD. I'm told this is an issue on the game's side, and not mine.. You know what this game needs? more players!

So play now! this game is fun! (for me). Bought this game 2 years ago was partialy playable then completely unplayable now. The devs have done nothing for a year . If you want to throw away your money buy this game.. bukly and simplisitic maybe worth a dollar

If harvesting the souls of sheep sounds like fun. Don't pass up this chance to join purple goat and his best mouse pal. Help them as they solve puzzles and meet other dead animal freinds. 5/5.

- Indirect Ant Simulator
- Upgrades
- Different Types of Ants to Control

- **Super Repetitive**

All in all, if you're not a person that doesn't like repetitive games, then this is definitely not for you. It's a really classic, relaxing game with relaxed graphics and gameplay, and it's a pretty good steal, because I bought it during an 83% off promotion sale, so it was only \$0.50.. 5 July 2018

For those unaware, this game is essentially a version of the LoL GM web-based game made into a client-based game. Both of the games are simple text-based games with relatively little player control and randomly generated players. Therefore, the game can certainly come off as bare-bones to those used to more in-depth games such as Football Manager. I must admit that it is hard not to see it that way, however I think the charm of this game is its simplicity. This is a game you can just kind of setup the way you want and let it run without having to micromanage just about anything. It's a neat little game to play on the side while you are working on homework or watching a TV show that is taking up the bulk of your attention. As far as I'm aware this was created by a one-man team and has been an ever evolving project for many years, starting with sports based management games before moving into esports. Therefore, I do give the developer a little leeway in terms of bugs and features, and the amount of time it takes to implement new ideas.

All of that said, I simply cannot recommend this game for purchase at \$20. At it's current launch state the game runs and that is about it. Half of the features are bugged and will crash your game and you are unable to customize anything without creating or downloading a custom database file, which can be incredibly time consuming. As I stated earlier, the game is incredibly bare-bones and lacks a lot of substance that games like Football Manager bring to the table. Not to mention there is already a web-based version of this exact game available for FREE. I understand that the developer is looking to bring in some much deserved cash flow to continue developing the game, but \$20 is just too steep a price to pay. I would be willing to pay at maximum \$10 and I feel that somewhere between \$5-\$8 would be a nice middle ground.

I'm a big Paradox Interactive fan so I don't mind supporting a game that is unfinished at launch and will take time to fully flesh out, but that should also come with a lower cash amount needed to get into the game and only later, if the game is doing well, would I be willing to invest more money into it to see continued progress towards the ultimate goal.

If you want to try a "demo" of this game go to <http://lol.zengm.com> and give it a try!. THIS IS ONE OF THE WORST GAMES I HAVE EVER PLAYED, but I absolutely love it. It is so poorly made and the voice acting is so bad that it is like watching a movie so bad it is good. it is so based on childhood reminiscence gameplay and i love it.. This may be OK as a standard game but as far as VR goes its totally unplayale. No oculus touch support in 2019, movement is by mouse and keyboard. I don't even have an available USB port to plug in a mouse on my laptop once the Oculus sensors are connected! So Im fumbling around with my trackpad, the cut scenes are slapped in your face, like frozen 2D planes. You have an avatar, which is nice for casting shadows your feet float just above the ground when you walk around and you can glitch out of your own head. I dunno. I hate to be a hater, but when you look at other indie VR horror games out there, like Kobold or Exorcist this doesnt hold up. I get that this was done a while ago, but I hope the devs come back top it to do a proper VR port. Thumbs up only because I love horror and support indie devs. . The game looks fun but that's about it.. Stifled was a mixed bag for me. I'd been looking forward to it's release a year after it came out on PSVR but had really been hoping they would adopt full motion controls for the PCVR version. They didn't, which while not a negative on the game, feels like a missed opportunity. To be able to knock on walls or throw objects certain distances would have opened up intricacies that are currently missing.

[That said, the overall game is still excellent. It's a really unique concept that is well executed. I liked how they explored the story and each level was a different representation of fear and darkness.](#)

[Gameplay here.](#)

[Pros:](#)

- [Layout of story, purely for you to figure out](#)
- [Vector art design](#)
- [Use of sound and microphones](#)
- [Atmosphere](#)
 - [Cons:](#)
 - [Motion controls :\(](#)
 - [The 'real world' graphical quality isn't great and can be slightly jarring after coming from the cool vector art](#)
 - [Price to length. A little high for a relatively short game. But not overly so. Overall the game is recommended. A great new exploration of VR that will get the hairs on the back of your neck tingling!. I made a poor decision and my best friend died. I got an achievement for it. This is awful. What to say about this apawling excuse for a "heavy goods" engine. Slips more then a cracked up squirrel on ice. Can't not handle 1000 ton trains like the real one can. No head code selection at all. sounds are horrid. No BR green livery or a mention of Evening Star. Even the model is flawed to the point where the tender body and chassis will become 2 separate objects not to mention the valve rods are set too low so they poke through the bottom. I can go on and on but the main point is just avoid this complete disgrace of an engine which does nothing to show the true power of the real machines if you want an amazing heavy goods engine I highly recomend the USATC S160.. I don't know what should i say about this mod.](#)
